- Derive a status in an Agile project
- Adapt the design of an Agile process

Assessment:

Weighting	Nature of assessment	Learning outcomes
50%	Written Test on Agile mindset and practices (week 5)	1, 2, 3, 4 ,5
50%	Group Project: Oral presentation and demonstration of product from Agile project. Assessed as a group with peer review component. (week 13)	1, 2, 3, 4, 5

Learning and teaching approaches:
Designed for participants to learn by experiencing an Agile mindset via a combination of lectures, class discussions, team exercises and a group project.

Learning resources required: Refer to the current programme booklist

Learning resources recommended:
Cohn, M. (2010). *Succeeding with Agile: Software Development Using Scrum.* Addison-Wesley.
Poppendieck, M, and Poppendieck, T. (2003). *Lean Software Development Toolkit.* Addison-Wesley.
Smith, G, and Sidky, Ahmed. (2009). *Becoming Agile in an Imperfect World.* Manning.

Accreditation
Upon passing the course, participants will achieve ICAgile Certified Professional (ICP) status. ICP is a certification issued by International Consortium for Agile that differentiates participants to industry peers as understanding the Agile mindset.
